PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience designing and delivering scalable, responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in REST API development, JWT authentication, role-based access control, and component-based UI architecture. Strong foundation in data structures, version control (Git/GitHub), and agile collaboration. Passionate about writing clean, maintainable code and solving real-world problems through technology.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Responsive Web Design, UI Development

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control (RBAC)

Database: MongoDB, Mongoose ODM

Tools & Other: Git, GitHub, GitHub Pages, VS Code, npm, Postman

Concepts: MERN Stack, MVC Architecture, Component-Based Architecture, Version Control, Agile

WORK EXPERIENCE

Web Developer Intern | Coincent.ai

July 2023 – September 2023

- Developed responsive web pages using HTML5, CSS3, and JavaScript, adhering to modern web standards and cross-browser compatibility best practices.
- Built reusable React UI components, improving code maintainability and reducing development time by enabling component reuse across pages.
- Collaborated in an agile team to test, debug, and ship frontend features, improving overall website usability and performance.

PROJECTS

HRPortal — Full Stack HR Management System — MERN Stack

April 2026

- Built a full-stack HR Management Portal using MongoDB, Express.js, React.js, and Node.js (MERN stack), supporting end-to-end employee lifecycle management.
- Implemented JWT-based authentication and role-based access control (RBAC) to enforce separate access levels for HR administrators and employees.
- Designed RESTful APIs for employee CRUD operations, leave management, and attendance tracking with proper error handling and input validation.

StudentPortal — Student Performance Prediction System — MERN Stack

February 2026 – March 2026

- Developed a full-stack web application using the MERN stack to predict student academic performance based on user-provided input parameters.
- Built RESTful APIs with Node.js and Express.js to handle seamless frontend-backend communication and data processing.
- Applied statistical analysis and machine learning logic on the backend to generate performance predictions, improving actionable insights for educators.

Personal Portfolio Website — React.js

July 2025 – October 2025

- Designed and deployed a fully responsive personal portfolio using React.js with a component-based architecture for maintainability and scalability.
- Deployed the application on GitHub Pages using a production build pipeline, ensuring fast load times and public accessibility.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

June 2019 – May 2023

Sree Venkateswara College of Engineering

CERTIFICATIONS

- Complete Web Development Course — Hands-on training in HTML, CSS, JavaScript, React.js, Next.js, Node.js, and responsive web design.
- The Complete 2024 Web Development Bootcamp — End-to-end modern web development including version control with Git and GitHub.
